08/2023 - 01/2024

Islamabad Pakistan

Learned web development fundamentals at **AUSES Society**, gaining hands-on experience with **HTML** and **CSS** while working on real projects.

Achievements/Tasks

- Design and Development
- Testing and Debugging
- Deployment

SKILLS

C++

JavaScript

Python

HTML5

CSS3

Bootstrap

Tailwind

React js

React Router

Redux Toolkit

Node js

Express js

MongoDB

Oracle

PERSONAL PROJECTS

Life Fitness Gym Website (11/2023 - 11/2023)

- This project i made in my first semester which assigned by our teachers using **HTML5** and **CSS3**. This was my first three pages website and i learnt a lot things.

Safe Fundz Website (01/2024 - 01/2024)

- This project i made when i was serving Auses Society in the first semester using **HTML5** and **CSS3**

Todo APP (06/2024 - 05/2024)

- Developed a **Todo App** during my second semester break while learning **React JS**. Utilized **Context API**, **Tailwind CSS**, and **Local Storage** to create a responsive, user-friendly application for task management. This project enhanced my skills in state management, styling, and data persistence.

Weather App (07/2024 - 07/2024)

- Created a weather application during my second semester break, focusing on **API handling**. Integrated a **Weather API** to fetch real-time data and display weather information. This project enhanced my skills in API integration and data management.

Personal Portfolio (11/2024 - 11/2024)

- Built a responsive portfolio with **React JS**, using **React Hook Form** for forms, **Hash Router** for navigation, and **Framer Motion** for animations. Integrated **EmailJS** for email and used **React Typewriter**, **React Icons**, and **Lucid Icons** for modern effects and design. This project highlights my technical and creative skills.

Attendance Management System (11/2024 - Present)

- Built a real-time attendance tracking application with JWT-based authentication. Users can check in and out, record work hours, and receive task assignments. Admins and team leads manage attendance, while employees view their working hours. The system includes features like role-based dashboards and time-based check-ins for seamless operations.
