## EDUCATION

### Bachelor of Science in Software Engineering

Air University Islamabad

2023 - 2027

## WORK EXPERIENCE

### Team Member – Web Developer Group

Microsoft Learn Student Ambassadors

10/2023 - Present

The **MLSA Society** empowers students in tech. As a Web Developer, I build impactful solutions, enhance skills, and contribute to innovation.

Achievements/Tasks

- Designed and developed websites using modern technologies.
- Resolved bugs and performed thorough troubleshooting.
- Resolved bugs and performed thorough troubleshooting.

### Team Member – Web Developer Group

AUSES Society

08/2023 - 01/2024

Learned web development fundamentals at AUSES Society, gaining hands-on experience with HTML and CSS by working on real-world projects.

Achievements/Tasks

- Designed and developed static websites.
- Tested, debugged, and deployed completed applications.

## SKILLS

C++

JavaScript

HTML5

CSS3

Tailwind

Docker

Shadcn

React js

React Router

Redux Toolkit

Node js

Express js

MongoDB

Oracle

## PERSONAL PROJECTS

### Space Shooter Game

- Built a desktop game using C++ and SFML utilizing concept of object oriented programming

### Banking Management System

- Built a desktop banking management system using C++ utilizing concept of Data Structure

### Todo APP

- Developed a Todo App during my second semester break while learning React JS. Utilized Context API, Tailwind CSS, and Local Storage to create a responsive, user-friendly application for task management. This project enhanced my skills in state management, styling, and data persistence.

### Weather App

- Created a weather application during my second semester break, focusing on **API handling**. Integrated a **Weather API** to fetch real-time data and display weather information. This project enhanced my skills in API integration and data management.

### Personal Portfolio

- Built a responsive portfolio with **React JS**, using **React Hook Form** for forms, **Hash Router** for navigation, and **Framer Motion** for animations. Integrated **EmailJS** for email and used **React Typewriter**, **React Icons**, and **Lucid Icons** for modern effects and design. This project highlights my technical and creative skills.

### Project Management System

- Building a real-time project management application with JWT-based authentication. The system includes check-in/check-out, work hour logging, task assignments, role-based dashboards, and time-based check-ins for efficient team management.
